

Amendments to the claims:

Claims 1-20 (canceled).

C<sup>1</sup>

21. (currently amended) A system for use in a vehicle comprising:  
a receiver for receiving entertainment programs provided by a plurality of sources, the entertainment programs being classified in a plurality of categories based on contents of the entertainment programs;  
a processor for associating indicators, representing respective ones of the sources, with the categories of the entertainment programs provided by the sources; and  
a display for presenting thereon[[, for]] a given category, together with a collection of one or more indicators associated with the given category, thereby facilitating selection of a source represented by an indicator in the collection to receive an entertainment program classified in the given category.

22. (previously presented) The system of claim 21 wherein at least one of the sources is a radio station.

23. (previously presented) The system of claim 21 wherein at least one of the sources is a television (TV) source.

C<sup>2</sup>

24. (previously presented) The system of claim 21 wherein at least one of the sources is an audio source.

25. (previously presented) The system of claim 21 wherein at least one of the sources is a video source.

Serial No. 09/923,125

26. (previously presented) The system of claim 21 wherein at least one of the sources is a compact disk (CD) source.

C<sup>2</sup>  
27. (previously presented) The system of claim 21 wherein at least one of the sources provides weather information.

28. (previously presented) The system of claim 21 wherein the indicator includes a sign identifying the source represented thereby.

29. (previously presented) The system of claim 21 wherein the source is selected by selecting the indicator representing the source.

---

Claim 30 (canceled).

---

C<sup>3</sup>  
31. (currently amended) A system for use in a vehicle comprising:  
a receiver for receiving signals containing entertainment programs provided by a plurality of sources, the entertainment programs being classified in a plurality of categories indicated in the signals based on contents of the entertainment programs, at least one of the categories being selectable; and

a display for providing thereon a selected category, together with at least one an option associated with a source which provides an entertainment program classified in a the selected category, the option being selectable to receive the entertainment program from the source associated therewith.

---

C<sup>4</sup>  
32. (previously presented) The system of claim 31 wherein at least one of the sources is a radio station.

Serial No. 09/923,125

33. (previously presented) The system of claim 31 wherein at least one of the sources is a TV source.

34. (previously presented) The system of claim 31 wherein at least one of the sources is an audio source.

35. (previously presented) The system of claim 31 wherein at least one of the sources is a video source.

C4 36. (previously presented) The system of claim 31 wherein at least one of the sources is a CD source.

37. (previously presented) The system of claim 31 wherein at least one of the sources provides weather information.

38. (previously presented) The system of claim 31 wherein the option includes a sign identifying the source represented thereby.

39. (previously presented) The system of claim 31 further comprising a processor for highlighting the option after a selection thereof.

---

Claim 40 (canceled).

---

C5 41. (currently amended) A method for use in a system in a vehicle for receiving entertainment programs provided by a plurality of sources, the entertainment programs being classified in a plurality of categories based on contents of the entertainment programs, the method comprising:

C<sup>5</sup>  
associating indicators, representing respective ones of the sources, with the categories of the entertainment programs provided by the sources; and

presenting on a display[, for]] a given category, together with a collection of one or more indicators associated with the given category, thereby facilitating selection of a source represented by an indicator in the collection to receive an entertainment program classified in the given category.

---

42. (previously presented) The method of claim 41 wherein at least one of the sources is a radio station.

C<sup>6</sup>  
43. (previously presented) The method of claim 41 wherein at least one of the sources is a TV source.

44. (previously presented) The method of claim 41 wherein at least one of the sources is an audio source.

45. (previously presented) The method of claim 41 wherein at least one of the sources is a video source.

46. (previously presented) The method of claim 41 wherein at least one of the sources is a CD source.

47. (previously presented) The method of claim 41 wherein at least one of the sources provides weather information.

48. (previously presented) The method of claim 41 wherein the indicator includes a sign identifying the source represented thereby.

C<sup>6</sup>

49. (previously presented) The method of claim 41 wherein the source is selected by selecting the indicator representing the source.

---

C<sup>7</sup>

50. (currently amended) A method for use in a system in a vehicle, comprising:  
for receiving signals containing entertainment programs provided by a plurality of sources, the entertainment programs being classified in a plurality of categories indicated in the signals based on contents of the entertainment programs;[[,]] ~~the method comprising:~~

selecting one of the categories; and

providing on a display the selected category, together with at least one an option associated with a source which provides an entertainment program classified in the selected category, the option being selectable to receive the entertainment program from the source associated therewith.

---

51. (previously presented) The method of claim 50 wherein at least one of the sources is a radio station.

52. (previously presented) The method of claim 50 wherein at least one of the sources is a TV source.

C<sup>8</sup>

53. (previously presented) The method of claim 50 wherein at least one of the sources is an audio source.

54. (previously presented) The method of claim 50 wherein at least one of the sources is a video source.

55. (previously presented) The method of claim 50 wherein at least one of the

Serial No. 09/923,125

sources is a CD source.

56. (previously presented) The method of claim 50 wherein at least one of the sources provides weather information.

CD  
57. (previously presented) The method of claim 50 wherein the option includes a sign identifying the source represented thereby.

58. (previously presented) The method of claim 50 further comprising highlighting the option after a selection thereof.

---

Claim 59 (canceled).
